SYED ZAID KARIM

6204027036 | karimzaid370@gmail.com | *LinkedIn* | *GitHub*

SUMMARY

Detail-oriented Data Analyst with a strong technical foundation in SQL, Power BI, and Python. Experienced in building interactive dashboards using DAX and transforming raw data into actionable business insights. Skilled in process automation and eager to drive data-led decision making.

EDUCATION

Arka Jain University **7.65 CGPA**

B.tech in Computer Science-SPL(Data Science) 2022-26

PROJECTS

Live Crypto Analytics & Forecasting Engine(Python & Streamlit)

- Live App : cryptodashboardlive.streamlit.app
- Real-Time Data Pipeline: Built a robust data pipeline in python to fetch live cryptocurrency market data (Price, Volume, Trends) via external APIs, ensuring minute-by-minute accuracy .
- Predictive Analytics: Integrated time-series logic to visualize trends and volatility, aiding in short-term investment analysis

Sales Performance & Profitability Dashboard | Power BI, DAX, Excel

- Business Intelligence: Developed an interactive dashboard to evaluate sales performance across regions and product categories, identifying key revenue drivers.
- Advanced Analytics: Utilized DAX to create complex measures for Total Sales, Profit Margins, and Year-over-Year Growth.
- Strategic Insights: implemented ranking logic to highlight top/bottom performing cities and customers, enabling targeted decision-making.

WORK EXPERIENCE

Venturing Digitally Pvt Ltd | **Oct 2025 – Present**
Data Analyst Trainee **Jamshedpur, Jharkhand**

- **EV Market Dashboard:** Developed a **Power BI** dashboard analyzing **269K+ records**; visualized Tesla's dominance (111K+ units) and a **79.8% BEV market share** to track adoption trends.
- **Supermarket Analytics:** Designed a sales tracker for **322K transactions**; identified a **60% female customer base** and peak hours (7 PM) to optimize staffing.
- **Data Pipeline:** Managed the full data lifecycle by extracting raw data via **SQL** and cleaning inconsistencies using **Python (Pandas)** to prepare datasets for visualization.

Infotact Solutions (Remote) **May 2025 – July 2025**
Data Analyst Intern

- Analyzed historical sales data to identify key revenue drivers and seasonal trends.
- Performed rigorous data cleaning on large data sets to ensure accuracy for city and category level analysis.

TECHNICAL SKILLS

Languages & Databases: SQL, Python

Data Visualization & BI: Power BI (including DAX, Power Query), Microsoft Excel

Python Libraries: Pandas, NumPy, Matplotlib, Seaborn

CERTIFICATIONS & JOB SIMULATIONS

- **Data Analytics and Visualization Job Simulation Accenture (Forage), Data Analytics Job Simulation Deloitte (Forage)**
